

Educations

Degree granting

- 2024-now **Harvard University**
Ph.D. student in Linguistics
- 2020-2024 **Tsinghua University**
B.A. in English Language and Literature
Certificate of Interdisciplinary Honors Program in Logic (A+ in all courses)

Visiting experience

- 2023 Spring **Harvard University**
Visiting Undergraduate Student

Summer schools

- 2026 European Summer School in Logic, Language, and Information
- 2026, 2024, 2022 Tsinghua Logic Summer School
- 2025 Linguistic Society of America Summer Institute
- 2025 North American Summer School in Logic, Language, and Information

Research Interests

- Semantics and Pragmatics from an interdisciplinary perspective

Conference Proceedings

- **Wang, Yiqian & Kathryn Davidson.** (2026). Presupposition filtering in disjunction: The role of exclusive interpretation. In *Proceedings of Sinn und Bedeutung 30*.
 - Talk presented at SuB 30, Frankfurt, Germany, (2025).

Conference Presentations

- **Wang, Yiqian, Chloe Frey, Nozomi Tomita, & Kathryn Davidson.** (2026).
 - Contrastive inferences across languages and across modalities.
 - Poster at the 4th Experiments in Linguistic Meaning Conference (ELM), Philadelphia, US.
- **Wang, Yiqian.** (2025).
 - Presupposition filtering in disjunction: Does exclusive interpretation play a role?
 - Talk at the 11th Experimental Pragmatics Conference (XPRAG), Cambridge, UK.

Past Research Projects

- **Contrastive inference in Mandarin:** How definiteness-marking in grammar affects pragmatic reasoning 2023 Summer
 - Conducted as a research assistant at Meaning & Modality Lab at Harvard University
- **Factors influencing the level of visual statistical learning:** Generalization of the covariance between features and the stability of features 2022 Fall
 - Course project in *Cognitive Psychology*, set as an exemplar for future enrollees
- **Mechanism of metaphor processing:** Influence of familiarity with the target domain on the effectiveness of metaphor 2022 Spring
 - Got selected into the 16th cohort of the Spark Program at Tsinghua University

Teaching Assistance Experiences

- | | | |
|-------------------|---|---|
| <i>Course</i> | Logic, Computation and Games | 2023 Fall |
| <i>Instructor</i> | Johan van Benthem | <i>founding director of ILLC at the University of Amsterdam</i> |
| <i>Level</i> | Undergraduate honors course at Tsinghua University | |
| <i>Coverage</i> | Public announcement logic, dynamic epistemic logic (DEL), probabilistic DEL, topological semantics, logics for games & games for logics | |
| <i>My duties</i> | Design weekly assignments and grade them; organize class activities; answer questions from philosophy & math & CS students; manage online platforms | |
- | | | |
|-------------------|---|-----------|
| <i>Course</i> | Modal Logic and its Applications | 2022 Fall |
| <i>Instructor</i> | Jeremy Seligman | |
| <i>Level</i> | Open course offered by Tsinghua University on XuetangX | |
| <i>Coverage</i> | Tense logics, doxastic logics, epistemic logic | |
| <i>My duties</i> | Design exercises for each lecture; manage online course materials; answer questions from students | |

Services

- Harvard's Language and Cognition talk series *Co-organizer* 2025-2027
 - I am responsible for organizing 5-6 talks per semester
- 35th Semantics and Linguistic Theory Conference *Member of the Organizing Committee*

Grants

- Interdisciplinary Mind Grant (\$4,938) Harvard Mind Brain Behavior Initiative 2026

Honors

- Yun-Cheng Sa Memorial Fellowship, Harvard University 2025-2026
- Spark Program (16th Cohort), Tsinghua University 2022-2024
University-wide research training program; ~50 selected from ~3,500 students per cohort

- Comprehensive Merit Scholarship, Tsinghua University 2021-2022
- Social Work Merit Scholarship, Tsinghua University 2020-2021

Extracurricular Activities

- Tsinghua University, Department of Humanities, Student Academic Activities Center
Director, Competitions Department 2021-2022
- Tsinghua Innovation Center
Feature Writer, Profile Interview Series 2021-2022
- Tsinghua Linguistics Society & Mountaineering Society
Core Member 2021-2022

Skills

- Programming languages: Python (PyTorch, NLTK); C++; R (tidyverse, ggplot2, lme4, brms)
- Markup languages: LaTeX; HTML
- Natural languages: Mandarin (native); English (advanced); German (basic); Latin (basic)
- Quantitative/formal foundations (selected coursework): multivariate calculus; linear algebra; probability theory; statistical inference; information theory; mathematical logic
